

**NorthCape
34**

ABOUT BRAD ROWE

Brad Rowe's long-standing love affair with the ocean and his passion for quality led to the creation of the NorthCape 34. Brad had identified a gap in the market for custom boats manufactured to the highest possible standards and finished immaculately – that deliver form, function, and stunning good looks.

Brad comes from a renowned fishing family that has achieved many national and world billfish records and he has fished throughout his life with

success. In 2003, Brad launched his first sports fisher design, the NorthCape 27 Bluefix, a 7.4m custom-built trailer boat. Since Bluefix hit the water she has won the Bay of Islands Swordfish Club trophy for the most billfish caught on a non-commercial boat six times.

With two small children of his own, Brad wanted a boat that not only excelled at game fishing, and that was perfect for entertaining and family cruising.

The NorthCape 34 is that boat. She performs beautifully when chasing down fish while also being the ideal luxury family boat.

Crafted with passion,
sculpted with care.

The NorthCape 34 is a true custom-build. Every element is crafted with passion and meticulous attention to detail, creating New Zealand's best-looking sports fishing launch.

Built by Bluefix Boatworks, the NorthCape 34 is sculpted with care to produce a special craft that is unmatched worldwide for its size.

The deck drainage system excels when reversing at speed.

The NorthCape 34 features a flared bow, tumble-home stern and the lines of a beautiful woman. She is powered by a single 440hp Yanmar engine, with the shaft and driveline in a tunnel. Featuring a 9hp bow thruster, she cruises at 23 knots, with a top speed of a tick over 28 knots.

A very clean transom with flush-mounted trim tabs means there's nothing to catch the leader when wiring fish. The cockpit is self draining and all the hatches have compression seals to keep the bilges dry, even when the cockpit is wet.

The NorthCape 34 has a fine entry for cutting through a head sea and a moderate V aft with large chines combining to create a stable fishing platform with a very low centre of gravity. 900mm-high gunnels and the cleanest cockpit layout of any sports fisher on the market complete the picture of the ultimate luxury sports fishing craft.

The ultimate luxury sports fishing craft.

The single Yanmar 440hp engine with the shaft and drive line in a tunnel ensures that the NorthCape 34 performs exceptionally well. Reversing at seven knots, the cockpit is dry.

Our scupper and deck drainage system are integrated to create a very clean look, and also improve function. Even when the boat is reversing at speed and water is most of the way up the transom, the drainage system will continue to work. Water from within the hatch gutters and on the deck will still be able to leave the boat.

The transom door is on a water-tight compression seal so the only way for water to enter the cockpit is over the covering boards or from out of your deck hose.

Comfortable and beautiful interior.

The custom paintwork and mirror-polished stainless belting with no exterior fastenings provide a stunning exterior aesthetic.

Coupled with a gorgeous leather interior featuring native New Zealand Tawa woodwork, luxury accommodation for six, a full galley along with a large bathroom and separate shower, she is both comfortable and beautiful. The drop-down back window provides an ideal entertaining area and a real point of difference.

SPECIFICATIONS

Hull Length	10.5m (34.4 feet)
Beam	3.95m
Draft	900mm
Deadrise (at transom)	18 degrees
Displacement	7000kg

LWL	9.3m
